Tip 4-To Delete a Track from a Minidisk
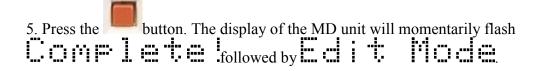

With the minidisk inserted, do the following steps:

1. Select the track to delete by **turning** the silver selection knob. The display of the MD unit should show the desired track number to be deleted.

2. Press the [MODE] button. The display of the MD unit should read **Edit Mode**.

3. **Press** the silver selection knob. The display of the MD unit should read **Track Erase?**

4. **Press** the silver selection knob. The display of the MD unit should read **Track OK?**

5. Press the [●REC] button. The display of the MD unit will momentarily flash **Complete!** followed by **Edit Mode**.

After completion of the above steps, the unit will be revert to Edit Mode. Refer to Tip 5 to learn how to exit the Edit Mode.
